Reviewer’s report

Title: Effect of an Interactive E-learning Tool for Delirium on Patient and Nursing Outcomes in a Geriatric Hospital Setting: Findings of a Before-After study

Version: 0 Date: 29 Mar 2017

Reviewer: Carol J Farran

Reviewer's report:

This is a timely and well-written manuscript. The study addresses an E-learning Tool for Delirium of persons in a geriatric hospital setting. The authors have included a comprehensive review of the literature, provide a clear and appropriate description of study methods, analyses and discussion. Study findings have clear implications for future work in this area, either descriptive or for future intervention testing. The authors are commended for their contributions in further understanding patient and nursing outcomes relative to delirium.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
