Reviewer’s report

Title: Single and Dual Antiplatelet Therapy in Elderly Patients of Medically Managed Myocardial Infarction

Version: 2 Date: 24 Feb 2018

Reviewer: Danan Gu

Reviewer's report:

1. The authors need to address the general concerns raised by the second reviewer. In the R2 version, I did not see their response to the comments.
2. Reviewer raised a specific question about similar data availability in Taiwanese subjects related to use of aspirin, etc in Western societies. To me, if there is no such studies in Taiwan, the authors could emphasize this as a limitation of the existing literature, and novelty of the study. The authors also need to stress their significance of the study.
3. Reviewer #2 raised a concern about reliability/robustness of small sample used in this study. The authors seemed miss this point. To me, it should be adequately justified and acknowledge its limitation.
4. I notice that there is one more author added in the list in R2 version. Please justify.
