Reviewer’s report

Title: 10-year follow-up of the Super-Seniors Study: Compression of morbidity and genetic factors

Version: 0 Date: 01 Oct 2018

Reviewer: Francesca Marchegiani

Reviewer's report:

In the paper titled "10-year follow-up of the Super-Seniors Study: Compression of morbidity and genetic factors" by Tindale et al., the authors evaluated the morbidity of long lived individuals who reached the extreme limits of human life span. The authors considered both physiologic and genetic factors and they found a compression of morbidity at extreme ages, particularly in centenarians.

I find merit in this manuscript. The paper is well written and the design of the study and the methodology are correct and very interesting. References are appropriate and authors have experience in this type of study.

I think that this manuscript is suitable for publication in this current form.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
