Reviewer’s report

Title: 10-year follow-up of the Super-Seniors Study: Compression of morbidity and genetic factors

Version: 0 Date: 14 Nov 2018

Reviewer: Daniela Mari

Reviewer's report:

The main strength of this study is the selected cohort consisted of a substantial number of oldest old (n.480).

Some limitations of the study should be mentioned: 1) the very small simple size of subjects that have answered to the follow up, even if after 10 years it is difficult to get in touch with the participants to the original study 2) it would be interesting to know the life expectancy anticipated from the demographers for that cohort in that region at baseline.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
