Reviewer’s report

Title: Relationships between Orthostatic Hypotension, Frailty, Falling and Mortality in Elderly Care Home Residents

Version: 0 Date: 27 Dec 2018

Reviewer: Roman Romero-Ortuno

Reviewer's report:
This is a well-written study convincingly showing that orthostatic hypotension (consensus and initial definitions) and a frailty index are retrospectively and prospectively associated with falls in a cohort of care home residents. The study adds value to this field due to the inclusion of frail care home residents.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
