I’d asked you to reflect and comment on the value of the DALY given that anti-hypertensive medication, which is the biggest contributor, likely saves and extends lives. So viewing that as a negative is an oversimplification of what DALY really represents.

Because you have chosen not to weigh in on that complexity, I feel your paper has not reached its potential.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
