Reviewer’s report

Title: Exploring the usefulness of indicators for referring people with dementia and their informal caregivers to activating interventions: a qualitative analysis of needs assessments

Version: 0 Date: 04 May 2019

Reviewer: Zhuoran Yin

Reviewer's report:

1. The authors may provide more background information about these caregivers, e.g., their education level, the relation between the PWD and CG, how many years they become the dyad.

2. It is still not very clear to me what are the best indicators after I read the manuscript. The authors may clarify it or indicate the best ones in the appendix I.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
