Reviewer’s report

Title: Applying a new concept of embedding qualitative research: An example from a quantitative study of carers of people in later stage dementia

Version: 0 Date: 18 Dec 2018

Reviewer: Deborah Levine

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

This is a well written article. The topic is important. Comments serve to clarify the paper for the reader.

Please include actual questions of standard interview guide used for structured interviews with carers in Figure 1.

Clarify how the qualitative data included in this manuscript differ from the data collected using the guide (Figure 1) included in the structured interviews.

It is possible to include open-ended questions in semi-structured interviews. Please provide justification for collecting and analyzing comments that were not systematically collected from all interviewees using questions in a standard guide. Please discuss the validity and potential biases of collecting and analyzing comments that were not systematically collected from all interviewees using questions in a standard guide.

Is the term "embedded qualitative study" valid and commonly used?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
