Reviewer’s report

Title: Prognostic value of frailty in elderly patients with acute coronary syndrome: A systematic review and meta-analysis

Version: 0 Date: 30 Dec 2018

Reviewer: Albert Ariza-Sole

Reviewer’s report:

Interesting paper about a clinically relevant topic.

Although previously described, this is one of the biggest studies regarding the prognostic impact of frailty in ACS patients. Interestingly, it confirms the association between both frailty and prefrailty with poorer outcomes, independently from covariates.

Just a minor mistake. The reference 35 is cited as Julio's study. The first author of this study is Julio (Name) Núñez (surname). I suggest to cite as Nuñez's study.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
