This is a very comprehensive review. It is important to clarify the diagnosis and intervention of delirium. However, a few issues still need to be improved.

1. **METHOD:** If the literature search can be added, this review will be more convincing. Therefore, it is recommended to add "Search strategy and selection criteria".

2. **Cost-effectiveness** may be an obstacle to intervention by multidisciplinary teams. Therefore, cost-benefit analysis is recommended to be included in the content.

3. **Typo:** page 7—line 21—"uniprofessional"

**Are the methods appropriate and well described?**
If not, please specify what is required in your comments to the authors.

No

**Does the work include the necessary controls?**
If not, please specify which controls are required in your comments to the authors.

Unable to assess

**Are the conclusions drawn adequately supported by the data shown?**
If not, please explain in your comments to the authors.
