Reviewer’s report

Title: Exploring the Implementation of the Community for Successful Ageing (ComSA) program in Singapore: Lessons Learnt on Program Delivery for Improving BioPsychoSocial Health

Version: 0 Date: 24 Apr 2019

Reviewer: David Nicholas Blane

Reviewer's report:

Dear Authors,

I am satisfied that you have addressed the substantive comments made by the reviewers.

Some minor points:
- There is inconsistency throughout with regard to the placing of punctuation after quotes, with, for example, (FGD4) sometimes coming before, sometimes after the full stop.

- It is preferable in reporting qualitative findings to include more detail about whom each quote was from, e.g. (FGD4, senior manager, male) or (FGD2, volunteer, female).

- on p16, the last sentence of the first paragraph needs a full stop before it, and would read better without the last comma.

- Also on p16, the first sentence of the second paragraph doesn't make sense. Later in the paragraph, "trough" should be "through" and your brackets need revision in the final sentence.

- on p.19, not sure if "legalizing" is the word you were looking for in relation to cognitive participation? And in the final paragraph, it should be "outcomes" not "outcome".

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes
Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
