Title: Prevalence and determinants of frailty in the absence of disability among older population: A cross sectional study from rural communities in Nepal

Version: 1 Date: 12 Jun 2019

Reviewer: Ana Maseda

Thanks the authors for checking and reviewing most of comments made by both reviewers. Nevertheless, I would like to include some missed minor corrections:

- Authors are still using the term depression instead of depressive symptoms (abstract- line 70, line 222)

- The term "elder" should be also deleted (line 108, 197)

- Authors should include some bibliography justifying the relationship between social factors (such as family relationship) and frailty (this aspect is not covered in the introduction section).

- It should be helpful if authors include the sentence about the assessment of memory concentration problems in the Methods section.

- The way of collecting data about alcohol, smoking or physical activity is not too methodological. This aspect should be considered in the Limitations section.

Thanks again for the corrections made that have improved the manuscript quality.
