**Reviewer’s report**

**Title:** Living alone and mortality among older people in Västerbotten County in Sweden: a survey and register-based longitudinal study

**Version:** 0  **Date:** 06 Mar 2019

**Reviewer:** Tjalling Jan Holwerda

**Reviewer's report:**

A very interesting study, with a large amount of participants. Thank you for giving me the opportunity to read this study

There are some points which need attention

Page 3

The findings about Sweden need replication, it has been written to strong

Page 7

The table is unclear, I would suggest a table with
Living alone HR
Correction for
Age HR
Employment status HR
Education HR
Cardiovascular risk HR

Page 10

The authors were not able to adjust for cognitive functioning and other medical diseases such as cancer and depression which account also for a large mortality in the western world. Also networksize and physical functioning were not adjusted for. These points need to be adressed in the discussion
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
