PEER REVIEWER ASSESSMENTS:

OBJECTIVE - Full research articles: is there a clear objective that addresses one or several testable research questions? (Brief or other article types: is there a clear objective?)
No - there are minor issues

DESIGN - Is the current approach (including controls and analysis protocols) appropriate for the objective?
Yes - the approach is appropriate

EXECUTION - Are the experiments and analyses performed with sufficient technical rigor to allow confidence in the results?
Yes - experiments and analyses were performed appropriately

STATISTICS - Is the use of statistics in the manuscript appropriate?
Yes - appropriate statistical analyses have been used in the study

INTERPRETATION - Is the current interpretation/discussion of the results reasonable and not overstated?
Yes - the author's interpretation is reasonable

OVERALL MANUSCRIPT POTENTIAL - Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution? If not, can further revisions be made to make the work technically sound?
Probably - with minor revisions

PEER REVIEWER COMMENTS:

GENERAL COMMENTS: The paper is improved - but still with some issues.

REQUESTED REVISIONS:
For example, the Negin paper, in my opinion, addresses some of the problems with the UNAIDS estimates (particularly underestimates in this age group of interest. Instead, the authors removed the Negin paper from the text (but left it in the reference list. I would suggest the reference and paper remain in the intro with a brief discussion.) - and the background includes results from studies in Europe and the US - are no studies on the subject available from other middle income countries like Ghana? [in the intro, page 2. ...Methodist Faith Healing hospital, Ankaase, 319 HIV cases were recorded between 2013 and 2015. - are these incident cases?] Please provide a reference for the closed-ended questions (page 6 - where are the Qs from??) and details about the language translation process (lines 26–41).

ADDITIONAL REQUESTS/SUGGESTIONS:

English language edits throughout the text are still needed - but again, overall better.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Ye

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Ye

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Ye

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
