Reviewer’s report

Title: Discharge Outcomes Among Elderly Patients Undergoing Emergency Abdominal Surgery: Registry Study of Discharge Data from Irish Public Hospitals

Version: 0 Date: 17 Nov 2019

Reviewer: Claudio Codignola

Reviewer's report:

Well conducted and solid study. Statistical analysis is correctly performed and results are interesting and could influence daily activities in surgery wards. It should be very interesting to know something more detailed about the diagnosis and the surgical procedure adopted as well as the ASA score, but this is not possible, as stated by the Authors. Minor criticism is about tables, since they should be reviewed by the Authors: in some cases the sum of partial percentage is not equal to 100. Please correct this or explain the reason why the total is not 100.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
