Reviewer’s report

Title: Addressing safety risks in integrated care programs for older people living at home: a scoping review

Version: 0 Date: 18 Nov 2019

Reviewer: John Parsons

Reviewer's report:

Thank you for this submission that details a scoping review undertaken to explore the evidence for integrated care programmes where at least one intervention component addressed safety risks. Data were extracted on the programmes characteristics, safety risks addressed, and the activities and interventions used to address them. Overall I think that the article makes a significant contribution to the literature. It is well designed with a strong rationale for the research. The search strategy is described well and is in line with PRISMA guidelines.

There are three very minor points to revise:

Line 71 - I don't think it is relevant to mention Canada here.

Lines 62-67- more information is needed about integrated care programmes - maybe from line 107 -115

Lines 273-274 - rewrite as it is unclear what you mean

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
