Reviewer’s report

Title: Diagnostic utility of zinc protoporphyrin to detect iron deficiency in Kenyan preschool children: a community-based survey

Version: 1 Date: 04 May 2017

Reviewer: Crystal Karakochuk

Reviewer's report:

Just one minor point - regarding altitude of the study area and hemoglobin concentration cut off. In areas of >1,000 m the hemoglobin cut off for anemia should be adjusted. See Sullivan et al. Trop Med Int Health. 2008 Oct;13(10):1267-71.

Otherwise, the authors have satisfactorily responded to my comments.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
