Reviewer's report:

Dear author,

Thank you for making the necessary corrections. However the article is still very long and needs more trimming to be readable. Methods, results and discussion are still very long and so much detailed. You need to make them shorter. Keep in mind that there are 6 figures, 7 tables and 3 additional files. This is a huge amount of data for the readers to process. Therefore, they should not be described in a very detailed manner in text.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
