Reviewer's report

Title: Gardening can affect your lungs- Aspergillus ARDS in an immunocompetent patient

Version: 2 Date: 3 June 2014

Reviewer: Anna Skiada

Reviewer's report:

This is a case report of a severe lung infection attributed to Aspergillus fumigatus. It is an interesting case. My only comment is that a Minor Essential Revision should be performed: The manuscript must be corrected by an English speaking person because there are many language mistakes.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
