Reviewer's report

Title: The epidemiology, antifungal use and risk factors of death in elderly patients with candidemia: a multicentre retrospective study

Version: 4 Date: 2 October 2014

Reviewer: Geraldine Hall

Reviewer's report:

The updated and corrected manuscript has answered my original questions and others. I think that it is acceptable at this point although may not provide new material on the subject of candidemia but since the data is derived from a multicentre study in China it would be appropriate to that population.
