Reviewer’s report

Title: Helicobacter pylori Infection and its Association with Anemia among Dyspeptic Patients Attending Butajira Hospital, Ethiopia

Version: 3  Date: 3 October 2014

Reviewer: Can Boga

Reviewer’s report:

Major deficiencies:

1. If this study is planned as prospective manner, the authors should state in the text.
2. Exclusion criteria need to be clarification
3. A reliability test and factor analysis showing that the questionnaire is reliable and valid would increase the power of analysis.
4. There is no sufficient data for patient characteristics showing basic hematological analysis.

– etc. tests for exclusion of bleeding, and hemolysis are needed.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
