Reviewer’s report

Title: Biopsy-Proven Autoimmune Myocarditis in HIV-Associated Dilated Cardiomyopathy.

Version: 2 Date: 14 October 2014

Reviewer: MEGUMI YAMAMURO

Reviewer’s report:

Minor Essential Revisions

#1. In this manuscript, the authors should indicate time course of medical treatment, especially, the time course of the time of occurrence of myocarditis from antiretroviral therapy. We want to know the time course of changes in echocardiography, electrocardiogram, CRP, BNP levels and the amount of virus antibody.

#2. The authors should indicate the contents of medical therapy for heart, such as angiotensin converting inhibitor, beta blocker and mineralocorticoid receptor blocker.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
