Reviewer's report

Title: Implementation of infection control in health facilities in Arua district, Uganda: a cross-sectional study

Version: 3 Date: 28 March 2015

Reviewer: Jeremy Schwartz

Reviewer's report:

Major Compulsory Revisions

Minor Essential Revisions
Line 66: C Diff is not the most common cause of antibiotic-associated diarrhea
Line 167: correct "who was had been selected"
Line 182: need a comma following "five years)"
The sentence that goes from Line 185 to Line 199 is much too long and interrupted by too many parentheses. I wonder if this comprehensive list would be better suited for a table?
Line 225: "data base" should be "database"

Findings from Key Informants: you report only 2 themes. Is this true? And you only report 2 representative quotations. I find myself wanting more justification for these 3 themes. Plus, the 2nd theme contains 3 sub-themes.

Figure 1: I still question the usefulness of Figure 1. Number approached and number consented is equivalent throughout.

Discretionary Revisions
Line 72: change "especially" to "such as"

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**
I declare that I have no competing interests.
