Reviewer's report

Title: Simeprevir with pegylated interferon alfa 2a plus ribavirin for treatment of hepatitis C virus genotype 1 in patients with HIV: a historical comparison

Version: 1 Date: 26 January 2015

Reviewer: Enrique ortega-gonzalez

Reviewer's report:

The questions are well formulated and his approach is clear and precise. The methodology is appropriate for the goals that the authors present. The discussion is well structured, with analysis of the most relevant results. The title and abstract are accurate.

Level of interest: An article whose findings are important to those with closely related research interests.

Quality of written English: Acceptable.

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
