Reviewer’s report

Title: Streptococcus pneumoniae colonisation in children and adolescents with asthma: impact of the heptavalent pneumococcal conjugate vaccine and evaluation of potential effect of thirteen-valent pneumococcal conjugate vaccine

Version: 1 Date: 03 Nov 2015

Reviewer: Florens G.A. Versteegh

Reviewer’s report:

the authors state: However, advanced methods were used for pneumococcal detection and our findings are important because these high rates of pneumococcal colonization rise concerns on IPD risk in these patients.

I don't see yet how this remark ande these advanced methods correct for the lack of a healthy control group. This should either be explained or left out.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
