Reviewer’s report

Title: Recurrence of visceral and muco-cutaneous leishmaniasis in a patient under immunosuppressive therapy

Version: 0 Date: 08 May 2017

Reviewer: NIPAM SHAH

Reviewer's report:

INFD-D-17-00328

This is a well written case report on Leishmania infantum infection in a Belgian woman. Below are my comments:

1. Please mention about informed consent obtained from the patient in the Case presentation section of your report

2. Please discuss differential diagnosis in your presentation.

3. On page 4(Paragraph starting with "Treatment with liposomal Amphotericin B…..") : Line 15: Please replace the word "performed" with "given"

4. Discussion: Page 4: "L. Infantum is the etiological agent of VL in Europe….." Add the word "agent"

5. What are the strengths and limitations in your approach to this case? Please add a short paragraph of few sentences in your discussion

6. Please compare contrast your case with other L. Infantum case reports in the literature. I found a few reports from 2015 and 2016 which you may want to discuss.

7. References: Please add et al. after 6 authors. For example reference number 2 has 8 authors. Please add et al. after 6 authors.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
