Reviewer’s report

Title: Syphilis and HIV prevalence and associated factors to their co-infection, hepatitis B and hepatitis C viruses prevalence among female sex workers in Rwanda

Version: 0 Date: 23 Feb 2017

Reviewer: Barbara Castelnuovo

Reviewer's report:

I have concerns regarding the methods used for this analysis

1) It is not clear what is the rationale for the model used

2) Particularly some of the independent variables (HBV and HCV), which are also quoted by the authors as STIs, don't seem to be really independent

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
