Title: Modular Programming for Tuberculosis Control, the "AuTuMN" Platform

Version: 1 Date: 08 Jun 2017

Reviewer: Tom Sumner

Reviewer's report:

Thank you for addressing my major comments from the initial review in your response. While it would have been nice to see some illustrative examples, I feel that the additional details of the way in which the model has been adapted for country specific applications have helped to clarify the potential flexibility of the approach. I look forward to seeing the results of these detailed modelling exercises in future publications.

Are the methods appropriate and well described?
