Reviewer’s report

Title: Durability of switch regimens based on rilpivirine or on integrase inhibitors, both in association with tenofovir and emtricitabine, in HIV-infected, virologically suppressed patients

Version: 1 Date: 27 Oct 2017

Reviewer: Delphine Sculier

Reviewer's report:

Revision has been made according to the comments of both reviewers. I would just suggest to replace "highest HIV viral load" by zenith HIV viral load in the heading of table 2 - zenith being most commonly used than highest.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
