Title: The global effect of maternal education on complete childhood vaccination: a systematic review and meta-analysis

Version: 0 Date: 22 Aug 2017

Reviewer's report:

The manuscript was a delight to read. I enjoyed how succinct and clear this vital review has been presented. My only suggestion is to expand the Discussion session to include measures that may be adopted to improve maternal education which should inevitably enhance child vaccination uptake, particularly in areas where the included studies were conducted.
