Reviewer’s report

Title: A 2-year follow-up of patients with pharyngotonsillitis

Version: 0 Date: 16 Sep 2017

Reviewer: Rumina Hasan

Reviewer’s report:

This paper follows patients with pharyngotonsillitis to compare outcomes of patients with Group A streptococcal infections with those infected with other pathogens including F.necrophorum.

A well designed study and conducted albeit with a small sample size.

The study findings are important in terms of guidance for management of pharyngotonsillitis patients.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
