Title: A 2-year follow-up of patients with pharyngotonsillitis

Version: 0 Date: 13 Sep 2017

Reviewer: Veranja Liyanapathirana

Reviewer’s report:

The title is a bit misleading. It is better to state "A 2 year follow up study on patients with pharyngotonsillitis" only and leave the details about Fusobacterium necrophorum to the discussion and use it as a key word.

The 20 microorganisms tested for need to be included in the manuscript rather than just giving as a reference.

Table 3 needs to include details about the no of return visits for the control group too.

Figure 2 does not seem to add anything significant to the findings and is a confusing for interpretation, reconsider the need to have it.
