Reviewer’s report

Title: Knowledge, Attitudes and Practices on Schistosomiasis in Sub-Saharan Africa. A systematic Review

Version: 0 Date: 06 Aug 2017

Reviewer: Safari Kinung’hi

Reviewer’s report:

Overall, this review article addresses a very relevant contemporary research topic and its level of interest is very high. The article have very well reasoned out research questions, design and methodology. There are however few minor issues which the authors need to revisit as follows:

Introduction (Line 51 and 52): Schistosomiasis rarely occurs in the form of epidemics. It is better to rephrase this statement and say "The scale and trends of disease burden in sub-Saharan Africa varies considerably ..."

Discussions (Line 202): Sentence starting "According to ....". Authors are kindly advised to mention the name of the first author, then the number of the reference in brackets i.e. "According to [name of first author][15] ....."

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
