Title: The global switch from trivalent oral polio vaccine (tOPV) to bivalent oral polio vaccine (bOPV): Facts, Experiences and Lessons Learned from the south-south zone; Nigeria, April 2016

Reviewer's report:

I thank the authors for addressing my prior comments and for working to publish this important study. It is probably worth mentioning the recent events in the Democratic Republic of the Congo (http://www.who.int/csr/don/13-June-2017-polio-drc/en/), one of which seems to indicate a cVDPV2 outbreak associated with inadvertent tOPV use. This event demonstrates that the risk from inadvertent tOPV use is real and makes it even more important to ensure complete removal of all tOPV from vaccine supply chains in all countries.

Are the methods appropriate and well described?
