Reviewer’s report

Title: Seroprevalence of dengue IgG antibodies in symptomatic and asymptomatic individuals three years after an outbreak in Zhejiang Province, China

Version: 2 Date: 04 Jan 2018

Reviewer: Chandima jeewandara

Reviewer’s report:

The manuscript has been improved considerably and is suitable for publication with few minor language corrections and formatting.

Minor comments

Reference 1. I would have rather selected a better WHO reference than quoting the fact sheet.

Page 7 line 57; should be corrected as - manufacturers instructions - in two places in the same line

Page 8 line 6,7 "A positive ELISA result was defined as having > 11 Panbio units, 9-11 units was defi..." sentence needs completion

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
