Reviewer’s report

Title: Pretreatment loss to follow-up of tuberculosis patients in Chennai, India: a cohort study with implications for health systems strengthening

Version: 1 Date: 21 Nov 2017

Reviewer: Jon Zelner

Reviewer’s report:

This paper addresses an important problem in understanding the determinants of a key point of failure in the TB treatment cycle. The paper is clear, and well-written, and the study design and statistical methods are appropriate to the question and available data. I have no major objections to the manuscript and think that it makes a meaningful contribution to the TB literature

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
