Title: Guillain-Barre syndrome associated with hemorrhagic fever with renal syndrome in China: a case report

Version: 0 Date: 12 Nov 2017

Reviewer: Rafdzah Zaki

Reviewer's report:
This article reported a rare event of GBS associated with haemorrhagic fever with renal syndrome. The description of GBS similar to previous reported cases associated with Hantavirus, with additional information on type of GBS (AMSAN).

Overall this article has additional information to be highlighted, however need some improvement before publication:

1. This article need editing /proofreading. Few spelling and typing error e.g line 63 and 114 spacing, and line 103 spelling error

2. Inappropriate statement/conclusion:
   * Line 186- "GBS might only accompanied with Hantavirus infection in Europe and Asia". I don't think based on current evidence that author can conclude this. No cases reported from other continents (either no case or underreporting), thus unable to make association.
   * Abstract- "Conclusions: We reported the world's sixth case of Guillain-Barre syndrome associated with hemorrhagic fever with renal syndrome." This statement also inappropriate. This may be the 6th cases reported in literature, but does not mean the world's sixth case.
