Reviewer's report
Title: Guillain-Barre syndrome associated with hemorrhagic fever with renal syndrome in China: a case report

Version: 0 Date: 05 Nov 2017

Reviewer: Lei Zhang

Reviewer's report:
In this case manuscript titled "Guillain-Barre syndrome associated with hemorrhagic fever with renal syndrome in China: a case report", the authors studied a case report of a 62-year-old man with intermittent fever, chill, oliguria, remarkable leukocytosis, atypical lymphocytes, thrombocytopenia and was diagnosed as Guillain-Barre syndrome associated with Hantavirus infection. After immunoglobulin infusion, the patient recovered. The case was well described and overall level of this manuscript was good.

The specific comments:
1. Line 68, change 'testshowed' to 'tests showed'.
2. Line 89 and 175, author dose not have to emphasis the patient's daughter here. As CSF examination is not necessary for GBS diagnosis and author also stated in conclusion part that they for the first time classified GBS based on the electrophysiology characteristics, no CSF examination should not be limitation in this report.
3. Line 135 and 164, please leave space between two sentences.
4. Line 148, change 'Krea' to 'Korea'.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Unable to assess
Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
Not relevant to this manuscript

Quality of written English
Please indicate the quality of language in the manuscript:
