Title: Interferon-γ release assay as a sensitive diagnostic tool of latent tuberculosis infection in patients with HIV: a cross-sectional study

Version: 2 Date: 19 Oct 2018

Reviewer: Walter N. Dehority

Reviewer's report:

All salient modifications appear to have been made or appropriately addressed. It should be noted that in the revised manuscript, lines 357-358 contain the phrase "This argument, as suggested, was added in the paragraph of the limitations of the study." This seems to have mistakenly been taken from the response letter to the editor and should be removed/modified in the text of the manuscript.
