Reviewer’s report

Title: Prediction of Dengue Outbreaks Based on Disease Surveillance, Meteorological and Socio-Economic Data

Version: 2 Date: 05 Dec 2018

Reviewer: Oliver J Brady

Reviewer's report:

"We performed the concurvity check for all the predictor variables" - what did this involve and what criteria did the authors use to determine concurvity (or lack of it)- either describe or give a reference.

Personally, I would still like to see the authors mix up training and testing data periods to see if, as the authors claim, their chosen testing data period really is exceptional, but I understand that there may be time limitations that may not make this possible.
