Title: A case report of Dengue Haemorrhagic fever complicated with psoas haematoma requiring blood transfusion

Version: 2 Date: 10 Feb 2019

Reviewer: Stephen J Thomas

Reviewer's report:

I believe the authors have satisfactorily addressed my questions and comments. I believe the case report is adequate for publication and will add to the medical literature related to clinical manifestations of dengue virus infection.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
