Reviewer’s report

Title: Social and environmental conditions related to Mycobacterium leprae infection in children and adolescents from three leprosy endemic regions of Colombia

Version: 0 Date: 21 Dec 2018

Reviewer: Bruna Hinnah Borges

Reviewer's report:

Dear authors,

The manuscript is very interesting specially per studying the Mycobacterium leprae infection in children and adolescents, population most vulnerable, and it is very well written, but I think that it is needing to shorter specially the results. As for the method, the authors did not specify the selection criteria of the participants of the study and about data collection, I find interesting to include.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
