Reviewer’s report

Title: Genotypic determination of resistance and heteroresistance to clarithromycin in Helicobacter pylori isolates from antrum and corpus of Colombian symptomatic patients

Version: 0 Date: 31 Oct 2018

Reviewer: Avi Peretz

Reviewer’s report:

This is a very important issue. The antibiotic resistance rate of the bacterium is on the rise and therefore such work is important for determining the treatment of bacterial infection.

The work is well written, clearly formulated, and the results are clearly presented

The methods are current and the sample size is reasonable.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
