Reviewer's report

Title: Diversity of infectious aetiologies of acute undifferentiated febrile illnesses in South and Southeast Asia: A systematic review

Version: 2 Date: 06 Apr 2019

Reviewer: Suman Kanungo

Reviewer's report:

Screening process used in the review is not appropriate.

In this review quality of the studies and risk of biases were not assessed and this is problematic as there is strong evidence that inadequate reporting in studies can exaggerate or under report the estimates of the findings obtained.

Also, the statistical approach used in the review is not indicated in the methodology section.

Are the methods appropriate and well described?
