Reviewer’s report

Title: Characterizing the Disability Experience among Adults Living with HIV: A Structural Equation Model Using the HIV Disability Questionnaire (HDQ) within the HIV, Health and Rehabilitation Survey

Version: 1 Date: 15 Aug 2018

Reviewer: William L. Holzemer

Reviewer's report:

Excellent manuscript, contributing new knowledge about the role of disability and comorbidity of people living with HIV. The identification of "uncertainty" as a key concept in understanding predictors and outcomes was fascinating and from my experience, suggests it is a very important concept - not only in HIV but other areas such as oncology. I really enjoyed the manuscript.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
