Reviewer’s report

Title: Investigation of a cross-border case of Lassa fever in West Africa

Version: 1 Date: 02 May 2019

Reviewer: Elodie Calvez

Reviewer's report:

This manuscript was really improved. I still think a map could be useful to understand this case report. It's very hard for people who have never gone to this part of Africa to understand the patient circulation between the countries, the town and also the hospital. An homogeneization of the number (written as number or in letter) must be done.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
