Reviewer’s report

Title: Treatment outcomes and antiretroviral uptake in Multidrug-Resistant Tuberculosis and HIV coinfected Patients in Sub Saharan Africa. A Systematic Review and Meta-Analysis

Version: 0 Date: 16 Jul 2019

Reviewer: Muluken Melese

Reviewer's report:

The article is well written and well analyzed. I do not have comments except on line 2014 to 2016. The "cure outcomes range from 22.2% to 57.7% among patients on ART and from the 28.6% to 54.7% among those not on ART medication” but in Table one the result is the reverse and please align the result of Table one with the text.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
