Reviewer’s report

Title: Factors associated with isoniazid resistant tuberculosis among human immunodeficiency virus positive patients in Swaziland: A case-control study

Version: 0 Date: 05 Jul 2019

Reviewer: Peter B Mwaba

Reviewer's report:

In your methodology section, could you clarify on how the HIV infected patients were recruited. Was this a joint HIV/TB clinic with all patients having been diagnosed with HIV prior to the recruitment? What tests specifically for HIV were performed? Was there a group of patients who were tested for the first time at recruitment? A few comments on how the groups were managed/treated would make the paper even more interesting or an attachment of the ESwani guidelines on the treatment of DRTB. A good paper though.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
