Reviewer’s report

Title: Comparison of Sanger sequencing for Hepatitis C Virus Genotyping with a Commercial Line Probe Assay in a tertiary hospital

Version: 2 Date: 24 Jun 2019

Reviewer: Lize Cuypers

Reviewer's report:

I suggest the authors to extend their figure legends by including details on the colouring of the outer circle encompassing the phylogenetic tree as well as the colouring of the branches. Additionally, mention in the legend which support values you have visualised, personally I would only visualise support values (aLRT) for the main branches, not for all the nodes embedded deep in the tree.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
