Reviewer’s report

Title: Measles Outbreak in an Office Building in the Crowded Metropolis of Beijing, China

Version: 1 Date: 05 Jul 2019

Reviewer: Fabio Magurano

Reviewer's report:

The authors have responded to a large number of comments and they have updated tables.

Despite that, the paper needs to a better description of laboratory methods.

The authors didn't respond to comments related to molecular methods used to identify the genoytpe H.

Moreover, they don't provide sequences data and don't mention if sequences have been submitted in MeanS or GenBank database.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
